T1-Mapping and Outcome in Nonischemic Cardiomyopathy: All-Cause Mortality and Heart Failure

J Am Coll Cardiol Img 2016;9:40-50.

In the Methods section on page 42 the MOLLI sequence *acquisition scheme* reads “(3(3)3(3)5).” This has been updated to the MOLLI sequence acquisition scheme of “3(2)3(2)5.” This information is new and was not visible from the sequence parameters; the clarification of acquisition scheme was in part possible due to publication of the sequence exam-card as a part of the original paper, allowing external verification.

The authors apologize for this error.

The online version of the article has been corrected to reflect this change.
